

Online Application

eGrant.net

An unparalleled web-based application designed to maximize efficiency for grant makers, applicants, reviewers and recipients. eGrant.net's data collection and communication tools facilitate the entire grant or scholarship cycle (letter of intent, application, revisions, review, interim and final reports, etc.). It works with most data management software and can be tailored to match your foundation's grant-making process and "look." Improve service to applicants and reviewers while reducing publication, duplication, and distribution costs with eGrant.net.

An efficient and user-friendly on-line communication tool

- › Streamline the application process by collecting data online instead of on paper
- › Use for scholarship applications or competitive grant applications
- › Manage the entire grant or scholarship cycle (letter of intent, application, revisions, review, interim and final reports, etc) and provide online status information
- › Promote digital document management by collecting attachments as digital files, including multimedia
- › Reduce ineligible requests with submission filter
- › Streamline review process with eGrant.net Review Module
- › Optionally filter incoming requests by approving letters of intent or requests for information
- › Reduce data entry and increase accuracy with eGrant.net's easy import function
- › Prevent run-on answers with field size limits
- › Improve completeness with "required" fields
- › Increase data consistency and reduce unnecessary information
- › Enhance communication and provide better service to applicants and reviewers
- › Reduce publication, duplication, and distribution costs

We Are More than Just Software
